GOBYJET

THE OUTDOOR PORTABLE TANK CLEANING SYSTEM

Use multiple Gamajets to clean, anytime and anywhere with this portable, diesel-powered high pressure pump system. Capable of powering a variety of Gamajet cleaning machines simultaneously, the GobyJet system was originally created for tanks and trailers in the petroleum industry but can be used in any outdoor tank cleaning application where there is little or no access to a pump on-site.

Every Gamajet tank cleaning machine is fluid-driven, combining pressure and flow to create high impact water jets. These jets scour the entire tank interior in a repeatable and reliable 360-degree pattern, blasting contaminants from the surface. The GobyJet provides the necessary pressure and flow to develop the required impact for heavy-duty tank cleaning that can be accomplished at any location, in a safe and efficient manner.

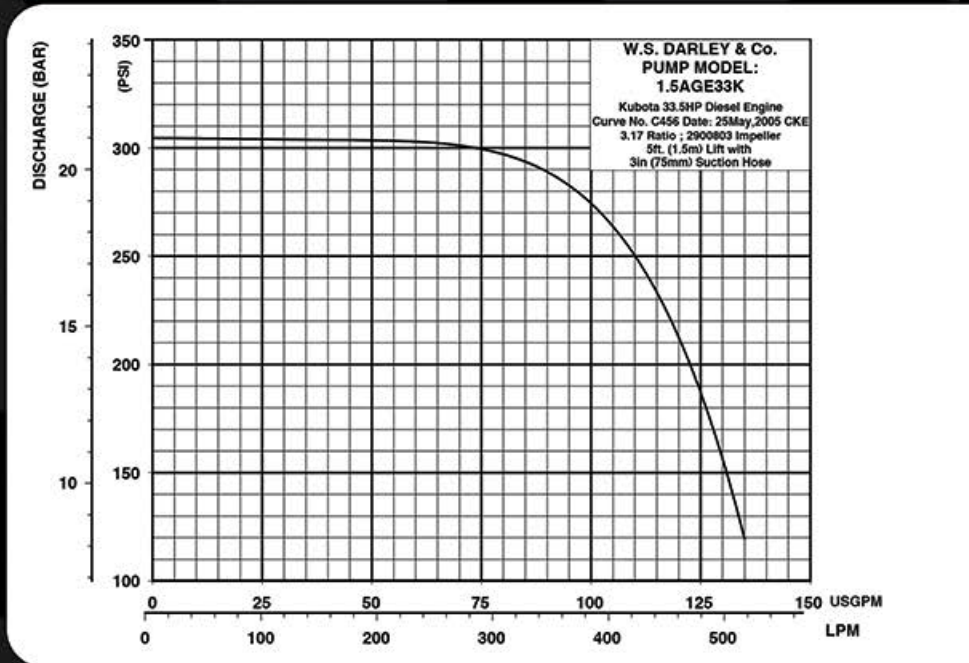

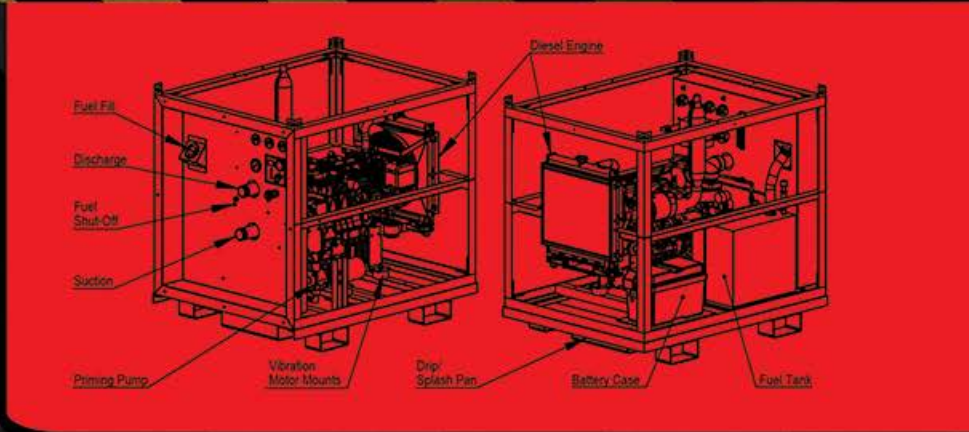

**GAMAJET
ANYTIME
ANYWHERE**

REMOVE YOUR CREW FROM DANGEROUS CONFINED SPACE ENTRY TANK CLEANING AND START SAVING TIME, MONEY, AND WATER TODAY!

With the GobyJet, you can Gamajet anytime, anywhere.

The portable design of the GobyJET allows for easy transporting and mobility, fitting right in the back of a pick-up truck, no special training required. In addition, the GobyJET is a fraction of the cost of large combination pump trucks, making it the best tool for the job.
